

500 PLAZA DRIVE

Secaucus, NJ

PROJECT TYPE:

Corporate – Interior Fit-out

ARCHITECT:

Gensler

Hollister Construction Services completed extensive capital improvements to 500 Plaza Drive, a 450,000sf Class A office tower owned by Marcus Partners. Our team transformed the outdated facility into a modern, headquarters-quality office tower.

During the nine-month project, Hollister performed significant upgrades to the base building systems, including selective demolition and upgrades to sprinklers, plumbing, HVAC and electrical systems. Hollister also created amenities on the first and second floors of the property, including a full-service cafeteria and dining area, a conference center and fitness facility, upgrades to the restrooms and the construction of a 250-space parking garage with 30 visitor-parking spaces in front of the building.

500 Plaza Drive, which features a four-story atrium lobby, is home to notable companies including The Children's Place corporate headquarters and AXA Financial. The property is positioned to attract additional companies to its roster of prominent tenants.
